To whom it may concern

Date: January 25, 2026

I am pleased to recommend Mr. Mainul Islam, whom I have known since 2016 during his undergraduate studies in the Department of Computer Science and Engineering at United International University (UIU). I taught him the course FYDP-1 and later supervised his Final Year Design Project (FYDP). These roles allowed me to closely observe his academic abilities, intellectual development, and research potential over an extended period.

Mr. Mainul consistently exhibited strong analytical skills, a clear understanding of complex concepts, and a sincere commitment to academic endeavors. During my class, he demonstrated attentiveness, curiosity, and the ability to comprehend intricate technical ideas. He frequently engaged in meaningful academic discussions and showed proficiency in applying theoretical knowledge to practical and research-oriented challenges.

As his FYDP supervisor, I observed his ability to work independently and collaboratively. He demonstrated discipline in research planning, problem formulation, and technical execution. He was receptive to feedback and demonstrated continuous improvement during the project. His performance reflects both academic seriousness and intellectual maturity, which are essential qualities for advanced studies.

In addition to his coursework and project work, Mr. Mainul served as an Undergraduate Teaching Assistant in the department. In this role, he assisted with laboratory sessions and supported academic and research-related activities. This experience strengthened his communication skills and reflected his early inclination toward teaching and academia.

Mr. Mainul has demonstrated outstanding academic excellence throughout his undergraduate studies. He graduated with a CGPA of 3.92 out of 4.00 and earned the distinction of Summa Cum Laude. In recognition of his consistent academic performance, he was awarded a 100% merit-based scholarship on seven occasions. Alongside his academic success, he has shown strong competitiveness through his participation and achievements in various academic and innovation-based competitions. These accomplishments reflect his strong problem-solving skills, creativity, and ability to perform effectively in intellectually demanding environments.

Based on my direct academic interactions with Mr. Mainul as his course instructor and project supervisor, I consider him to be a disciplined, capable, and highly motivated student. He possesses the intellectual ability, academic rigor, and

dedication required to succeed in advanced graduate study. I recommend him strongly for admission to an MSc or PhD program without reservation and am confident that he will be a valuable addition to any academic program to which he is admitted.

If further information is required, I would be happy to provide it.

Sincerely,

Swakkhar
